

What is claimed is:

1. An apparatus for trimming candle wicks comprising:
 - A means of vertically trimming a candle wick
 - A means of candle wick clipping removal from the immediate surroundings of the candle or container
 - A means to hold multiple candle wick clippings in the instrument
2. The apparatus of claim 1, wherein the instrument has a cutting devise and a backing pad upon which to produce a cutting or trim plane.
3. The apparatus of claim 1, wherein the instrument has a dual opposing cutting devise surface
4. The apparatus of claim 1, wherein the instrument has a scissor like action or reverse scissors like action.
5. The apparatus of claim 1, wherein the instrument has a loop type cutting tool.
6. The apparatus of claim 1, wherein the instrument has a tweezers like action.
7. The apparatus of claim 1, wherein the instrument has a pocket to hold the wick clipping or multiple wick clippings.
8. The apparatus of claim 1, wherein a means of suction is used to vacuum the wick clipping to a holding pocket so that more wicks can be trimmed prior to discard.
9. The apparatus of claim 1, wherein the instrument has a manual tilt ability to be able to move the NUB to the holding pocket by gravity for multiple NUB collection.
10. The apparatus of claim 1, wherein the unit is fabricated of metal, glass, ceramic, plastic, of other and combinations of these or like items.
11. The apparatus of claim 1, wherein the instrument has a length to trim the wick per candle manufacturers established distance above the cooled wax surface of the candle.

12. The apparatus of claim 1, wherein the instrument has an adjustable length to trim the wick to the operator preferred distance above the cooled wax surface of the candle.
